## Introduction

My work inspired by the naïve as well as the pure and innocence qualities found in folk art and children art. The spontaneous and unconstrained quality of my work came from my love in folk art and years of observation when teaching children art. I embrace the everyday life, history, tradition and various cultural aspects of my native land through a series of vibrant painting, collage and embroidery pieces. They record and preserve mainly social significant of my homeland through a joyful process of imaginative play and observation, the qualities of anthological, nostalgic and sentiment are always presence in my work.
